I would like to put forward my objection to the Incinerator at Binn Farm.

I have been a resident in Abernethy now for 3 years and I would like to be able to live here for many more happy years. Unfortunately though this plan to build an Incinerator just a short distance from our beautiful village has caused great concern to myself and many villagers and am sure this will bring nothing but stress and pain to the village. I have done my own personal research and have not heard one good thing about incineration. From America to Dundee and now even in Perth itself there is wide spread concern about these plants.

I have just had the great news that I am to become a father for the first time, but now I am so concerned about raising my child with an Incinerator in such a close distance, I have heard and seen so many reports on the hazards to human health and I can not just sit and let something that can harm my child and ourselves be built on our doorstep.

Abernethy has been tagged with a reputation of having a "Smell" already due to the Landfill. If this hasn't been regulated and managed properly by SITA up to now how can anyone give us a guarantee that the Incinerator will be safe for the villagers and not just be left to throw out any old toxic chemicals and smell.

I believe as well that there hasn't been enough publicity to this and that even now there are many villagers unaware of what could be appearing on their doorstep.

Please don't let this destroy a beautiful village and an area of Perthshire.

Thank You
