

Dear Sir/Madam

We would like you to note our objections to the proposed waste incinerator at Binn Farm, Glenfarg, Perthshire. Our concerns are detailed below:

1. In the village where we stay (Abernethy) there is already a problem with horrible smells coming from this site. This has been an ongoing problem for a number of years and has yet to be resolved and we feel another potential source of odours will only make this situation worse.
2. Noxious fumes and gases in the air - as we live downwind (in the prevailing conditions) we will be exposed to any by-products caused by the burning of thousands of tonnes of unregulated rubbish.
3. There has been no proof that other solutions and locations have been properly investigated, and the incinerator is a very costly method of waste disposal.
4. Environmental cost of bringing all the rubbish from the whole of Perth and Kinross area to this one site

Yours faithfully
